Designer glass upright UWG(R)*

With designer glass uprights the visible end of kitchen runs and islands get an attractive glass cabinet upgrade. The glass uprights are available in clear glass and grey glass. These open glass cabinets are especially decorative when paired with LED recess light Derby II, which can be mounted behind the top profile.

For end of run or room designs with base units in special heights:
360, 432 mm.

Can only be planned in conjunction with 16 mm top shelf.

Available glass colours:
Clear glass 01, Grey glass 035

Available profile colours:
010 Black, 014 Stainless steel appearance

Wall unit with glass doors Square, WSQ*

The 2020 collection has added a new colour finish for the wall unit with glass doors Square.

The previous finishes will thus be renamed:

Available product range Square WSQ* for 2020

- 321 aluminium framed front in Stainless steel appearance with 02 Matt glass
- 308 aluminium framed front in Stainless steel appearance with 035 Grey glass
- 329 aluminium framed front in Black with 39 Black glass

Handleless kitchen in XL format

XL height
New features 2020

A successful synthesis of storage space and beautiful design

LINE N stands for handleless kitchen aesthetics of the highest degree. For the 2020 collection the storage space-oriented XL height, which has already established itself for the long-term in the market, was expanded for LINE N. A separate XL height for highboards completes the XL product range for LINE N as well as for the standard range with handles and bar handles.

Tailor-made LINE N kitchens

XL height
New features 2020

XL height adds 10 percent more storage space—while only minimally changing the activity height. The XL carcass is thus not only (but also) ideal for taller people.

Combine with the next smaller plinth size to achieve added space in the unit interior as well as a finer plinth line.

LINE N

72 cm

Standard system height: 720 mm

The standard height of LINE N base units is 720 mm.

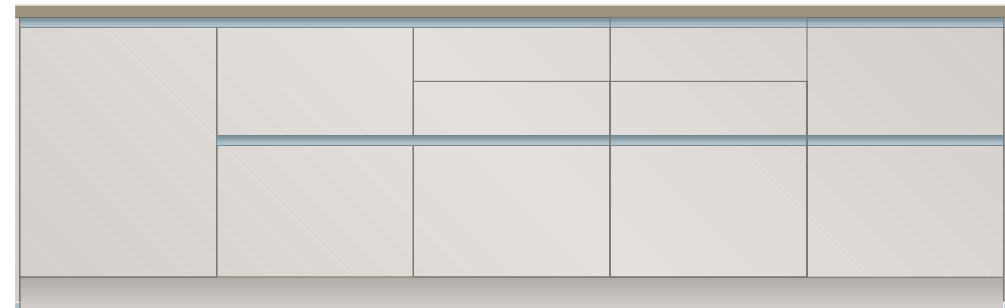

The continuous doors are 690 mm high, the drawer height is 164 mm.

Possible working heights: 80.6 to 95.8 cm.

Recommended for physical height upwards of approx. 150 cm.

LINE N XL

79.2 cm

XL system height: 792 mm

The new generation of kitchens in XL grid beautifully combines optimum storage space, a higher activity surface, and a balanced, aesthetic front design. The carcass height is 792 mm and thus provides roughly 10 percent more storage space than standard height. Continuous doors in the LINE N range are 762 mm high, the drawer is 164 mm high.

The XL height is also available for LINE N handleless kitchens.

Possible working heights: 87.8 to 103 cm.

Recommended for physical height upwards of approx. 170 cm.

A closer look at product improvements

Elements
New features 2020

Hob units for downdraft extractor fans

The selection of hob units for downdraft extractor fans has been revised. As of the 2020 collection there are no longer separate units for appliances with and without plinth motors. For this reason, it is absolutely necessary that the appliance information is included in the order, since drawer and pull-out depths are dependent upon the appliance used and the empty space planned and are configured accordingly at the factory. In the chapter on planning information, pages 8 and 9, the respective design sketches and information has been revised to represent this.

New design for internal tablars ITAB / ITAB-AJ

The design of internal tablars ITAB* is being changed to plastic, Slate grey.

Worktop APD inner corners in square design AP-IEK

For surcharge AP-IEK the inner corners of worktops and tables with décor edging can be ordered in square design.

Pole-mounted shelving system

The shelving system previously known as Backlight is returning to a basic design with aluminium support poles that are not lit.

The lighting can still be ordered optionally for surcharge MP-SRL.

Due to this change, the shelving system products have new item numbers and item codes.

New XL height for highboards

A new XL highboard height was created as part of the expansion of the LINE N range to include XL height.

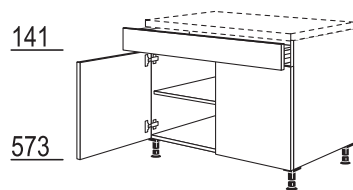

The carcass height is 1584 mm and is available in both LINE N and the conventional range with handles.

In light of this, a new connection height for dresser units also supplements the range. Dresser units for planning connections to XL highboards are 754 mm high (AJ*/-APK*-54).

More versatility for nobilia bathroom designs

The bathroom furniture range, which was successfully introduced in the market, has been significantly further developed for the 2020 collection. In fact, a handleless LINE N product range has been added especially for the bathroom. Also, occasional furniture in the form of sideboards and Midi units as well as mirrored bathroom cabinets and furniture hand basins made of mineral composite finish off the spectrum of possibilities.

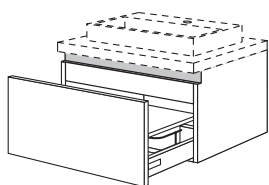

A multifaceted accessories range complements our bathroom designs with beautiful and useful details.

- connection for hot and cold water
- aerator 24 mm diameter
- flexible connection hoses
- tap hole 35 mm diameter
- height of spout above worktop 80 mm
- highest point above worktop 138 mm
- spout 100 mm
- chrome (17719)

SINGLE LEVER BASIN MIXING TAP LIVE, HIGH-PRESSURE

- with pop-up basin waste
- connection for hot and cold water
- aerator 18 mm diameter
- flexible connection hoses
- tap hole 35 mm diameter
- height of spout above worktop 225 mm
- highest point above worktop 310 mm
- spout 122 mm
- chrome (17720)

BATHROOM PRODUCT RANGE

nobilias range of bathroom furnishings has been extensively expanded. For a clearer overview of the bathroom range, all item groups—furniture, accessories, hand basins and bathroom taps—have been arranged in a coherent chapter sequence. This bathroom product list is a permanent part of the nobilia Sales Manual. It can be found directly following the accessories list in our Sales Manual.

NEW LABEL

FOR ELECTRIC APPLIANCES AND BUILT-IN SINKS

For an improved overview of new appliances and built-in sinks, we have introduced a new label.

ACCESSORIES FOR DOWNDRAFT EXTRACTOR FANS – IMPROVED ILLUSTRATION

The accessories for downdraft extractor fans are extensive. For an improved overview of this range of items, the entire accessories section has been provided with new images.

MICROWAVES AND FULLY AUTOMATIC COFFEE MACHINES

Microwaves and fully automatic coffee machines from chapter 9 have been sorted into their respective brand name chapters.

BORA AND MIELE APPLIANCES

The selection of appliances from Bora and Miele has been revised. The latest documents outlining the product range will automatically be made available to accredited Bora or Miele retailers through a separate mailing campaign.

BATHROOM DESIGN SUGGESTIONS

We have added 34 design suggestions for inspiration and to help simplify the bathroom design process. These can be found in the introduction on pages B 0.11 ff. The design suggestions primarily serve as inspiration, however, they can also be ordered as a complete bathroom using the item codes BSET* or NBSET* for LINE N designs.

**SCHOCK
BUILT-IN SINK
MONO D-100, LARGE,
CRISTADUR**

- for mounting in sink base units upwards of 600 mm width
- magma (87491)
- stone (87495)
- bronze (87492)
- ivory (87493)
- polaris (87494)

**SCHOCK
BUILT-IN SINK
MONO N-100, SMALL,
CRISTADUR**

- for mounting in sink base units upwards of 500 mm width
- magma (87486)
- stone (87490)
- bronze (87487)
- ivory (87488)
- polaris (87489)

**FRANKE
BUILT-IN SINK
MRG 211-77 RD5
FRAGRANIT+**

- for mounting in sink base units upwards of 450 mm width
- only flush-mounted installation
- graphite (87546)
- umbra (87549)
- stone grey (87548)
- ivory (87547)

**FRANKE
BUILT-IN SINK
MRG 210-42 RD5
